

National Van Builders, Inc.

The Executive Series

If Black Is Enough

What would Elegance,
Comfort, and added
Convenience do for you
and your clients?

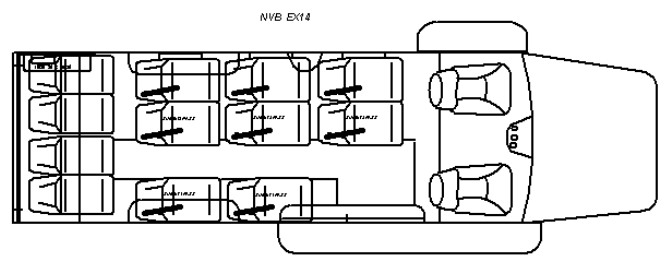

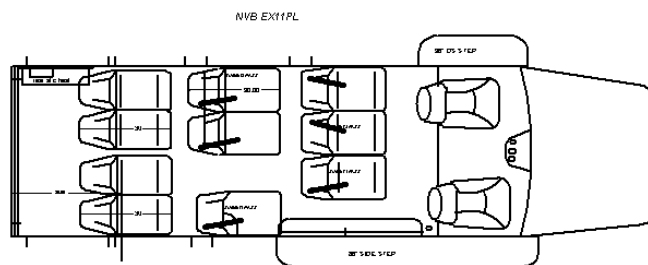

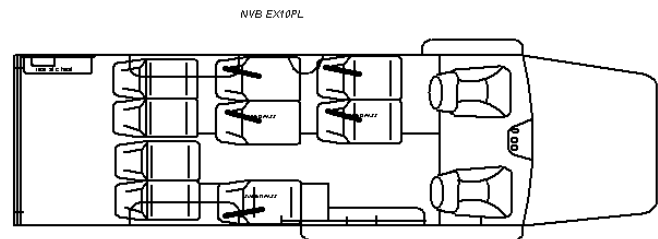

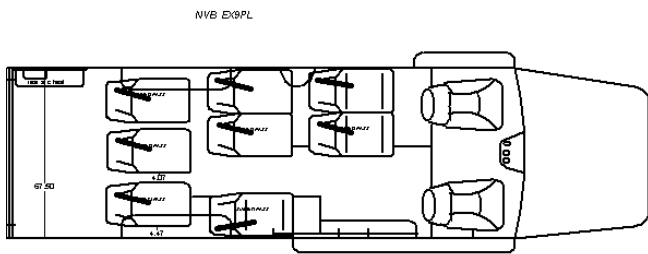

You have worked very hard to distinguish your business from competitors. You have learned the hard way that details matter. By focusing on your client's needs you have transformed a simple ride from the airport into a full service transportation company.

The Executive Series was specifically designed for you and your professional clientele.

No flash, just unrivaled comfort and convenience combined with durability and serviceability.

Our 9, 10 and 11 Passenger Center Aisle Models offer over 60cuft of luggage capacity. For larger groups, our 14 passenger model forfeits the luggage but not the added convenience or comfort. If you live long enough, you will realize that beauty is truly skin deep- NVB has painstakingly combined eye appeal with durability to create an executive transporter that works and keeps on working hour after hour, year after year.
